Angel Giovani Moreno Rivera

Phoenix, Arizona

📞(602)-793-2114 | 📧angel.moreno8424@gmail.com | 🌐**Website** | **GitHub** | **Linkedin**

Skills

- **Languages:** Python, Java, JavaScript, C#, HTML, CSS
- **Frameworks/Libraries:** React, ASP.NET, Express, Node.js, Next.js
- **Databases/Cloud:** MongoDB, Azure, PostgreSQL, Firebase, SQL
- **Tools/Technologies:** Git, GitHub, Prisma, REST APIs, JWT Authentication

Experience

Amazon Sortation Center Associate - Amazon Sortation Center *April 2026 - Present*

- Sort and scan packages using warehouse tracking systems to ensure accurate routing and shipment processing while adapting quickly to changing priorities and workloads

Full-Stack Developer Internship - Playtoon It | Remote *December 2025 - May 2026*

- Developed REST API endpoints and server-side functionality using Node.js, Express, and PostgreSQL
- Collaborated with developers through Git workflows, code reviews, and weekly meetings.
- Designed and enforced Role-Based Access Control (RBAC) using Next.js Middleware and Prisma to secure application routes and server-side operations.

ASU Senior Capstone Project - General Dynamics *August 2023 - May 2024*

- Developed a demo application to test hardware via SCPI commands, reducing manual testing.
- Led backend development for SCPI command parsing, validation, and execution
- Collaborated in Agile sprints, participating in planning, development, and project reviews

Technical Consultant - Independent Project (Pool Company) *Summer 2025*

- Designed a Google Sheets workflow to track pool job expenses and customer records
- Implemented Google Sheets formulas to automate calculation of expenses, taxes, and profit

Projects

Ticket Tracker – MERN, JavaScript, Bootstrap| Github | Live Demo

- Built a ticket management web app supporting ticket creation, assignment, and tracking
- Implemented role-based authentication and authorization using JWT
- Designed scalable REST APIs to support ticket comments and attachments

Pool Angel – Pool Service Management Platform **|** React, Node.js, PostgreSQL| Github | Live Demo

- Built a multi-tenant pool service platform with role-based access control and data isolation
- Developed an interactive route planner with geocoded maps and live travel-time estimates
- Enforced shared Zod validation across the frontend and backend for data integrity
- Deployed a full-stack pipeline with React, Netlify, Express, and Render

Education

- **Arizona State University** | May 2024 – **B.S in Computer Science**
  - Dean's List: Fall 2020, Spring 2021, Fall 2023, Spring 2024
